August News

"No winter lasts forever, no spring skips its turn" - Hal Borland.

Welcome to August where no matter how long the winter, spring is sure to follow. This month we are introducing a very exciting new treatment at Dermal. Have you heard of Platelet Rich Plasma (PRP) injections for anti-ageing? Read on for more information about this rejuvenating and safe treatment that uses your body's own enriched plasma to stimulate resident stem cells by growth factors. We also reveal what our #1 selling product is and how you can receive a special promotion if you purchase one this month!

Our new website is on its way, stay tuned...

Our #1 Selling Product - O Cosmetics Recovery Cream! You ❤️ this product.

Cosmedics

Specifically formulated to boost the skin's repair mechanism, help restore its protective barrier and dramatically assist reduction of inflammation. This superlight yet ultra-powered age defying cream has been fortified with potent antioxidants, which gives a "volumising effect without surgery" and ultimate skin radiance. V8 peptide complex™ ensures skin is super hydrated, protected and comforted.

August Promo's!

Buy your O Cosmedics hydrator in August and receive your Pro Dermal Peel Treatment for \$99

\$99

Buy your Skinsitut hydrator in August and receive your Professional Skinsitut Peel for \$77

\$77

Brain Changer Update

Hi, Mirielle here, skin health educator and integrative nurse.

As some of you know, I LOVE to learn & share my knowledge. Recently I went to an excellent seminar regarding brain health. You are probably thinking 'what's that got to do with skin?'....well, actually lots and poor brain health makes you age faster. Correct! One of the biggest take aways for me was that chronic inflammation in the body will drive neuro-inflammation. Conditions such as chronic infections, dysbiosis, pathogens/viruses, autoimmunity, poor diet and drugs/or toxins turn down a very important cell pathway for protection against cancer, radiation and decreases longevity. The thing is, by increasing your intake of certain phyto-nutrients, you can turn up this pathway, protecting you and increasing your longevity, including skin health. I've got lots more to share, so feel free to question me when you see me next or check out our Facebook page for further information.

Cheers to your best health, Mirielle

Blood Injections - The HOT NEW Beauty Treatment

A new approach, appealing to patients seeking a more natural method to facial rejuvenation, is regeneration with your own cells and more specifically, autologous platelet-rich plasma (PRP), which is a safe and tolerable procedure.

Regen Platelet-Rich Plasma (PRP) has been utilised in aesthetic medicine (UK, Japan, and Asia, Europe) to rejuvenate and slow down the ageing process. Regen PRP was introduced into Australia 5 years ago and it has been pioneered for facial rejuvenation in select patients with chronological ageing. Put simply, it is anti-ageing by biological stimulation of resident stem cells in the skin by growth factors.

Science supports the use of PRP for the augmentation and regeneration of hard and soft tissues. PRP is the source of concentrated platelet content present in blood. Apart from assisting blood clotting, platelets also release growth factors that assist the human body to repair itself by stimulating cells to regenerate new tissue. Today, platelet rich plasma can easily be separated from blood, through a process of centrifugation. Using your concentrated plasma permits the body to heal faster and more efficiently. Because your plasma (autologous) is used, there is no danger of disease transmission or reaction.

The following facial and body areas can be treated:

- ✓ Eye area for wrinkling
- ✓ Cheeks
- ✓ Thinning skin on the neck
- ✓ Jaw Line
- ✓ Back of hands
- ✓ Décolletage

Other Body Areas - breasts, knees, elbows, upper arms, and even post baby tummy. It can also be used for scarring or stretch marks PRP can also be combined with laser treatment and skin needling.
