

School Sailing Programs

Primary & Secondary School Programs

Mornington Yacht Club provides professional and highly enjoyable sailing programs purposed for primary and secondary schools. These include learn to sail experiences up to teams racing and school teams racing with a coach. The programs are customised to the needs of each school and can range from a one day sailing experience to a four day session program run over multiple days in a row or one day a week for four weeks.

The one day sailing experience for school groups gives students a taste of sailing, learning a little about boats and boat safety whilst getting physical in an outdoor environment.

A four session program (that can be run over multiple days in a row or one day a week for four weeks) gives students the opportunity to grasp the fundamental skills of sailing and become comfortable in a sailing boat.

There is also the option to include a power boat experience in a one day package up to a powerboat licencing course that can be completed over multiple lessons.

Our Training Boats

Optimists

The Optimist is the ideal boat to introduce kids to sailing. They are easy to setup and sail, virtually unsinkable and kids have lots of fun in them. Mornington Yacht Club has a fleet of ten available.

Pacers

Pacers are well suited for secondary students. We purchased six new Pacers in 2017 to ensure the best possible training and coaching experience could be provided. Our Pacers are also available for School Teams racing with professional coaches but be quick as spaces are limited.
